

Bending becomes child's play

BENDtronic

BENDtronic ...makes you an expert for any plate rolling task

Dear Muster Mustermann,

No more scrap when rolling challenging shells, and fitting parts starting with the first plate in batch production thanks to BENDtronic.

The revolutionary BENDtronic of HAEUSLER enables everyone, to control not only the movements of the machine but the bending result itself. The software is graphically supported, allows single-pass as well as multi-pass plate rolling and can be used for any kind of product shape like cylinders and pipes, ovals, tanks or other more complex geometries even up to S-shaped work pieces.
